

A ENFORCEMENT CONFIDENTIAL

March 27, 1989; 11:06 am - Sue Kennedy of E&E/FIT called me and we discussed:

1. Midvale Slag: Sue has written some comments on the draft SOW for RI/FS work. Her comments were mostly to address general issues that would impact scoring HRS II. We should receive the comments today or tomorrow.

2. Utah P&L/American Barrel: Sue had only one comment on the new HQ narr summary - a ? on the Meyers purchase date.

3. The Phase I wrapup meeting last week: Sue will make me a copy of the handouts and brief me on significant issues.

4. Sue and I will also attempt to work up a unified approach to presenting HRS II to outside groups such as the states, federal agencies. It will not be formal training, just a presentation. The HRS Management TDD may need more hours to cover these kinds of activities.

5. Sue was wondering if we had heard back on access to Richardson Flat. I said I had left a message with Ed Osika (UPCM); I will try to reach him again today. The prime date is still 4/1, but the crew may be delayed on other work (Bennett Paint) and would like 4/3 or 4/4 as backups; 24 hour notice would be given to UPCM before a change in the schedule.

Sue and I will get together Weds PM or Thurs AM to discuss these.
